A LETTER FROM THE PRESIDENT OF NUMISMATICA INTERNATIONAL

Why invest in rare gold coins? I could fill volumes answering this question, but at the outset we just ought to emphasize the point that virtually no stock or commodity has risen as spectacularly in value in recent years as have gold coins.

A multiplicity of factors have caused gold coins—from ancients to modern pieces—to appreciate in value in such dramatic fashion: the rise in the price of gold bullion, the increasing number of collectors, and intensified public interest in gold coinage of all types. Moreover, countless investors who have become disenchanted with the uncertainties of the stock market have turned to gold coins in order to shore up their sagging investment portfolios. "Time" magazine in a recent cover story on the inflation-ridden U. S. economy was moved to comment: "Gold coins have become a favorite haven for stock market refugees; their price has been rising steadily."

It really doesn't take a crystal ball to figure out why prices of classic gold coins in particular have almost literally gone right through the ceiling. **Their numbers are fixed and limited**, while the numbers of collectors and investors are growing in almost geometric proportions. The law of supply and demand is applicable here in its purest form.

What a prospective investor in gold coins ought to do is to pick up a copy of Robert Friedberg's most recent edition of "Gold Coins of the World" (3rd ed., 1971) and compare price estimates in this standard catalogue with current gold coin selling prices today. For example, the Dominican Republic 30 pesos of 1955, almost the size of a U. S. Double Eagle, was listed at \$60 in the 1971 Friedberg, and at that time it could have even been picked up for \$50 or so at either auction, or from a dealer's fixed price list. Today, it's nearly impossible to purchase for less than \$300.

No one, of course, can predict what the going price for this coin (which, incidentally, was issued to mark the 25th Anniversary of General Trujillo's rule over this Caribbean Republic), will be three or four years from now, but it's a well executed low mintage piece (only 32,750 specimens struck at Mexico City), and the price has nowhere to go but up.

Friedberg for 1971 listed the English Queen Victoria 5 pounds "jubilee" commemorative at \$375. Issued for the 50th year of Victoria's reign, this is a big coin containing approximately 1 and ¼ ounces of gold. As in the case of the Dominican 30 pesos, this is a low mintage specimen (just over 50,000 pieces struck at London's Royal Mint), with the bulk of those extant being permanently housed in museums and in private collections. Dealers today are asking approximately \$1,500–\$2,000 for the Victoria 5 pounds, with particularly sharp specimens selling for even more on those rare occasions when they reach public auction.

One investor commented on his experience with the coin: "I bought the Victoria 5 pounds of 1887 for investment purposes, but after owning the coin for a while, I really began to appreciate the beautifully executed portrait of the Queen and the magnificent Pistrucci "St. George Slaying the Dragon" design on the reverse. Then I decided I would keep it permanently as an outstanding example of numismatic art."

The "Super Rarities" of Britain have had even more spectacular price appreciations than the 1887 Jubilee 5 pounds. The Victoria "Una and the Lion" 5 pounds of 1839, for example (struck only in proof in very limited quantity for presentation purposes), was listed at \$3,000 in the 1971 Friedberg. At auction today, the going price for the coin, if available, reaches beyond the \$25,000 range.

Among other European coins, the Montenegro 100 perpera of 1910, portraying King Nicholas I, rated a \$1,250 estimate in the 1971 Friedberg, and in December of that year it sold at auction for \$1,900. At a May 1974 New York City auction, the 100 Perpera was knocked down for \$9,500. What will the coin bring in 1977 or 1978? Who knows? We do know this, however—the Montenegro 100 perpera has all the basic essentials that go to make up a solid investment piece. It's a big well-designed royal portrait coin, about the same size as a Double Eagle, was struck in proof only, and had an almost rock-bottom mintage of 802. Again, the price has nowhere to go but up.

Not once, in fact, during the past twenty years have prices for collectors' coins decreased. Can we make the same statement about the Dow-Jones Industrial Average?

The Monaco 100 Francs of 1950, portraying Prince Ranier III (the normal thickness variety), was priced at \$200 in the 1971 Friedberg. In June of that year, it realized \$580 at auction—and then in June 1974 New York sale it fetched an even \$3,000. The 100 Francs Prince Ranier, also approximating Double Eagle size, is another of the modern gold rarities since its mintage is recorded at a bare 500.

There are hundreds and hundreds of varieties of gold coins whose recent price histories have been as dramatic, or nearly so, as those of the aforementioned specimens. The demand for them by both investors and hobbyists is almost insatiable.

In respect to investing in gold coins, we certainly ought to note that they have as much liquidity as any other type of investment we can think of because dealers, in particular, are in constant need of choice gold pieces to replenish their inventories. They're always willing and eager to acquire any coins of gold.

Enjoy this catalogue—participate in this sale. The coins here are among the very best investments in the world today.

INFORMATION FOR NEW MAIL BIDDERS

If you have never before bid by mail, an explanation is needed. Basically the procedure is quite simple. You will note on the enclosed mail bid form a place for entering a lot number as well as the amount you wish to bid. After carefully examining the descriptions of the lot(s) in question, simply write down the lot number and then the maximum amount you are willing to pay in the appropriate columns. For example, let's assume you are interested in bidding on lot number 1 which carries an estimate of \$2,000-UP. Determine the maximum price you would pay for this lot and enter this amount on the mail bid form as follows:

Lot	Bid	Lot	Bid
1	1,875 ∞		

You will note we have used the term "maximum amount" above. The bid which you enter is the "maximum amount" or top price you will pay for a lot (unless you have checked one of the increase boxes). However, there is always a chance you may obtain the Lot for less! As indicated in our "Terms of Sale" we act as your agent and execute your bids as if you were there in person at the Sale. We will buy the Lot for you as cheaply as possible over the next highest bid. In other words, if your bid, for example, is \$1,875.00 on lot number 1 and the next highest bid, whether by mail or floor, is only \$1,000.00, the lot would be awarded to you at \$1,050.00 or a nominal 5% increase over the next highest bid.

Before entering your bids, please read carefully our "Terms of Sale". Bidding by mail permits the individual to participate in the auction sale just as though he were able to attend the sale in person. Many bargains are obtained through the medium of auction sales, and it can be a very exciting as well as rewarding method of obtaining wonderful investments for your portfolios. We look forward to your participation in our Sale.

Unique 1614 Gold Piece of Sigismund III

- 535 1614 - SIGISMUND III Vasa portrait inscribed on double taler dies and struck in gold in the weight of 5 ducats. Die variety as Czapski-1310 (R-6), which is listed as a double taler. The beautifully executed portrait shows the armoured hareheaded king wearing the high ruffled collar. The obverse inscription, SIGISMVND G POLONI ET SVECIAE REX, indicates that Sigismund held the thrones of both Poland and

Sweden. The reverse has the kings crowned shield within the collar of the Golden Fleece ("La Toison d'Or"), one of the greatest knightly orders of Europe. Struck at Gdansk.

This magnificent 5 ducats is unique and was never listed by Czapski, Gumowski, or by any of the other Polish cataloguers. The coin rested for many years in the Stanislaw Herstal Collection of Polish Coins and Medals and was offered to the public for the first time in the Bowers & Ruddy-Herstal Sale.

Bowers & Ruddy graded the specimen as a sharp EF-AU; it shows virtually no wear and still has much of the original mint lustre. A very small repaired hole at 12 o'clock above Sigismund's head is the only fault to have been discovered in this classic rarity.

A coin worthy of a place of honor in the finest specialized collection of Polish coins, or in a museum. Well worth a bid in the \$10,000-12,000 range. (Photo)

(\$90.-up)
- 1228 Same as above, the **Brilliant Proof** example. Very scarce and in demand. 7,755 minted. (\$120.-up)

PINE TREE DECEMBER 5 COIN AUCTION WILL OFFER
//
OUTSTANDING INTERNATIONAL RARITIES

Pine Tree Auction Company, a subsidiary of First Coinvestors, Inc., Albertson, New York, will hold its First Annual International Auction Sale on December 5, 1974, at 7 P.M., at the Barbizon Plaza Hotel, New York City. The event will precede the opening of the prestigious New York International Coin Show.

One of the many highlights of the auction will be the extremely rare 1825 Guatemala 8 Escudos gold doubloon. Herbert Melnick, Pine Tree chairman, said that to his knowledge the coin has never before appeared on the auction market in any grade. The coin should bring a bid of about \$35,000, he predicts, although he estimates its potential value at \$50,000. Struck at Guatemala City during the period when the Republic was a member of the Central American Federation, the obverse depicts the sun over five mountain peaks; the reverse shows the ceiba or silk cotton tree. Although most coins emanating from Guatemala during the period are well-worn, the specimen to be auctioned grades XF to AU.

The sale, which consists of over 1,400 lots of material, includes more than 550 lots of world gold. One hundred lots have been reserved for a mail-bid section--closing date for mail-bids is December 6 at 5 P.M.
